

## Company Overview

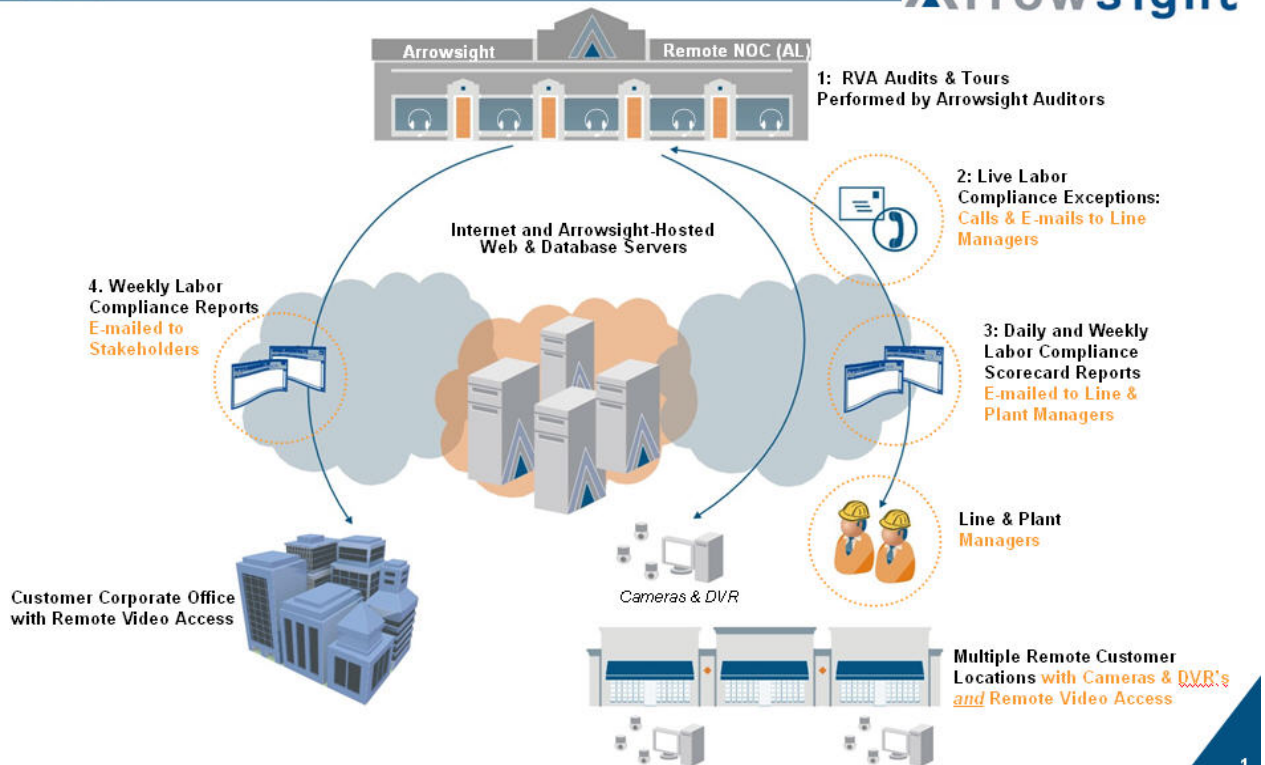

### Give Your Business A Performance Advantage.

Arrowsight, a web-based Application Services Provider, is the leading developer of remote viewing services and software. Arrowsight's remote viewing software was originally developed and marketed by its division, ParentWatch and has since become the remote viewing leader for the childcare community with 10,000 users. Our remote video auditing service transforms video and related data into tools for security, operational and marketing improvements. We're dramatically improving business practices across a wide range of industries including retail, Quick Serve, grocery, manufacturing, food processing, military, industrial and Homeland Security environments.

### Better Your Business

- Increase Efficiency
- Boost Productivity
- Increase Safety & Security
- Leverage Investments
- Increase Profits
- Better Practices

## RVA Platform Architecture

### **Get More From Your Infrastructure Investments.**

Increasing efficiency, boosting productivity and improving profits are priorities for all businesses, but leveraging existing investments is paramount in today's competitive climate. Our software integrates with existing security and monitoring systems, enabling companies to maximize their investments and minimize expenditures.

### **Tools that Transform Practices - and Improve Processes.**

Alone and unmonitored recorded data is worthless. Audited and analyzed, the data produces a bevy of value for businesses. Through Arrowsight's analytics, we deliver daily, weekly or monthly audits and compliance reports. Our reports monitor a myriad of benchmarks and critical control points including compliance, safety, quality, security, operational efficiency, customer service, quality and security and inventory shrinkage.

### **Isn't it Time You Used Remote Viewing Services to Better Your Business?**

Plumrose USA, Limited Brands and leading McDonald's franchisees are just a few of the companies that are using remote viewing services to better their business. Let us show you how our tools can transform your productivity, profits and overall efficiency.
