Two companies team to provide enhanced remote video monitoring

Arrowsight, Inc., headquartered in Mount Kisco, NY, and Intelli-Tec Security Services, of Westbury, NY, have joined forces to provide a new suite of remote viewing security services that can monitor security guards' performance and send managers a weekly "score card", via e-mail, that summarizes individual locations on a pass/fail basis.

The two companies are now offering "Remote Guard Tours," which provide round-the-clock monitoring and e-mail notification of key events; "Remote Video Auditing," which provides daily, weekly or monthly e-mail compliance scorecards sent by trained auditors; and "Video Alarm Verification," which provides instant e-mail links to video of an alarm event that can help security managers and local law enforcement authorities make critical decisions.

"We are pleased to be working with Intelli-Tec, one of the Northeast's leading security integrators, on a variety of security, monitoring and auditing services built on Arrowsight's remote viewing platform" said Adam Aronson, Arrowsight's CEO.
